Objective

I strive to create intuitive and beautiful user experiences from conception to implementation, while constantly challenging myself and learning new skills and technologies in interface design and front-end development.

Summary

- Having 6+ years of experience working as a front-end UI/Web developer in a corporate environment. Strong technical skills in complex website development including web-based applications
- 3 years' experience in working with Angular 7+ modules, services, templates, directives, services, and dependency injection to create a SPA
- Experience in software architecture designing simple architecture with separation of User Interface, Business Logic engine, Database engine, and core
- Experienced in working on the various phases of the Software Development Life Cycle like requirements analysis, design, coding, testing, debugging, and maintaining the websites
- Expertise in creating highly interactive web applications using HTML/HTML5, CSS/CSS3, Bootstrap, JavaScript, jQuery, Angular 7+, Tailwind CSS
- Hands-on knowledge of client-side design and validation using HTML and JavaScript frameworks such as Angular 7+
- Developing Design, Business Requirements, Flow, and documents for projects
