Technology Lead

ajaysh65@gmail.com • +91 8095240084 • [LinkedIn](#) • <https://ajjayyash.netlify.app/>

PROFESSIONAL SUMMARY

Results-driven Technology Lead with 9 years of experience in front-end application development, specializing in **Angular, TypeScript, JavaScript (ES6+)**, RxJS, and state management. Experienced in architecting and delivering enterprise-grade, scalable, and **responsive web applications** with a strong emphasis on **performance, accessibility**, maintainability, and user experience. Strong in modern front-end architecture, REST API integration, component-driven development, and building reusable, modular applications. Strong advocate of clean coding practices, SOLID principles, **Digital Accessibility (WCAG)**, responsive design, and Agile methodologies.

TECHNICAL SKILLS

Frontend: Angular8+, Typescript, JavaScript, RxJS, PrimeNg, HTML5, CSS3, SCSS/Sass, Tailwind CSS, Bootstrap 3+

Testing: Jasmine

Tools: Git, GitHub, GitLab, Postman

Practices: Agile/Scrum, Accessibility (WCAG),

Certifications: Infosys Certified Angular Expert

PROFESSIONAL EXPERIENCE

Technology Lead | **Infosys Limited** | **Client: T-Mobile**

Aug 2024 – Present

- Collaborated closely with client stakeholders to identify, analyze, and resolve critical production issues, significantly improving application stability and performance.
- Performed root cause analysis of recurring defects and implemented sustainable solutions, reducing issue reoccurrence and enhancing system reliability.
- Worked with QA teams and end-users to troubleshoot compatibility issues across browsers and devices, improving code quality, maintainability, and user experience.
- Supported and contributed to the successful production launch following the Angular 18 migration, ensuring seamless functionality and minimal business disruption.
- Participated in defect triaging, impact assessment, and release validation activities to ensure high-quality software delivery in production environments.
- Applied debugging and performance optimization techniques to resolve complex front-end issues and improve overall application responsiveness.

Software Engineer | **Go Digit General Insurance Limited**

Aug 2021 – Aug 2024

- Designed, developed, tested, and maintained software applications, ensuring high performance, scalability, and reliability.
- Translated business and user requirements into efficient, maintainable, and high-quality code solutions.
- Collaborated with cross-functional teams, including business analysts, QA engineers, and product stakeholders, to deliver projects on schedule and within scope.
- Participated in all phases of the Software Development Life Cycle (SDLC), from requirements gathering and design to deployment and support.
- Implemented best coding practices, design patterns, and quality standards to improve application maintainability and long-term stability.

- Contributed to the successful delivery of enterprise applications by ensuring adherence to technical requirements, coding standards, and project timelines.
- Worked in Agile/Scrum environments, actively participating in sprint planning, daily stand-ups, retrospectives, and release activities.

Software Engineer | Carveing Solutions LLP

May 2017 – Aug 2021

- Developed responsive HTML templates for desktop and mobile platforms based on wireframes, UI designs, and business requirements.
- Designed and implemented landing pages and web applications for multiple client projects, ensuring optimal performance and user experience.
- Redesigned and enhanced corporate websites using Responsive Web Design principles, Bootstrap framework, and CSS Media Queries.
- Developed cross-browser compatible and mobile-friendly user interfaces using HTML5, CSS3, JavaScript, jQuery, and Bootstrap.
- Collaborated with designers and stakeholders to translate visual concepts into interactive and responsive web experiences.

PROJECTS

Infosys Limited | Client: T-Mobile | Angular 20, Typescript, HTML5, Bootstrap, SCSS

- Collaborated with client stakeholders, QA teams, and end-users to identify, troubleshoot, and resolve critical production issues, perform root cause analysis, and implement long-term solutions, improving application stability, performance, code quality, and user experience.

Digit Insurance | Angular 13 Typescript, JavaScript, HTML5, Bootstrap, SCSS, AEM

- Designed, developed, tested, and maintained scalable Angular-based enterprise applications for Digit Insurance, translating business requirements into robust and high-quality technical solutions.
- Collaborated with product owners, business analysts, QA teams, and backend developers to deliver new features and enhancements.
- Implemented reusable components, optimized application performance, and followed clean coding standards to improve maintainability and scalability.
